COLLEGE COMPETITION MANAGEMENT

ABSTRACT

Colleges are a hub of technical and cultural festivals and competitions, which helps in the growth of students. For this, a very well established and proper management website is required. This website basically provides a competition management system for colleges. On registering for each program, the student has to pay a registration fee. By bringing together easy registration and management processes, this website provides a trouble-free and facile competition managing system for a college, which allows students to easily register for events, purchase associated merchandises and allows coordinators to easily handle registration and student details.

USERS

- Administrator/Coordinators:
  An admin or coordinator manages the website as a whole. They can:
    - login
    - controls the programs
    - open/close registrations according to due dates
    - edit or add or delete registrations
    - manage registration fee payments
- Students:
  Students are the user who participates in these programs or competitions. They can also:
    - login
    - register by creating an account
    - register for events/programs
    - delete/ view registered events
    - select time slots for online games and register for the same.
